Human Computer Interaction

056 542 6525 . Mawadastw@gmail.com . Makkah-Alzaidi . [LinkedIn profile](#)

## About Me:

I'm a Human computer interaction bachelor degree student, I have experience in using Figma, HTML and css ,developing interfaces and the knowledge of other techniques

## Education:

### **UQU University | 2022-present**

Human computer interaction (HCI), GBA for the 7th term: **3.74 out of 4**

High school | 2019 – 2022

Ramla Abi Sufyan Girls High School, GBA: **98.68 out of 100**

## Experience:

### **Persuasion techniques project | August-November 2024**

As a team we created an interactive website using Figma to promote tourism in Saudi Arabia using persuasion techniques. We implemented familiar design techniques, like placing the profile icon in the upper right corner, to enhance user experience. Our goal is to encourage users to explore local cafes, restaurants, and hotels, making reservations seamlessly through our app.

### **Visual design project | December 2023-March 2024**

As a team we developed an app and designed its logo and interfaces using Figma, applying concepts we learned in class. The app offers two key features: it suggests alternatives for missing ingredients and provides recipes based on what users have on hand, helping them create delicious dishes with available ingredients.

### **Web development project | December 2023-March 2024**

As a team we created a subsection for the university website dedicated to the university gym. It includes features like "Make a Reservation" for booking gym visits and "Your Bookings" for tracking reservations, enhancing the experience for students.

### **Database project | August-November 2023**

As a team we worked on creating a bank database system. We defined the business rules, we created Chen's, UML notations and mapped the relational schema and normalized the database.

## Skills Summary:

- Fast learning
- interfaces designing
- Beginner front-end developer
- User research
- time management
- creativity

## Certificate:

- **User interface design principles**  
Edraak platform
- **UX research**  
Edraak platform
- **Web design and programming**  
Ustudy platform
